***Strong. Big. Powerful.**
"Particular requirements? Anything is possible" – that is part of our company philosophy. Krampe produces individual trailers and is no high-volume manufacturer. Special wishes are our daily business. With the Carrier models we follow a new, additional way. Decades of trailer manufacturing taught us that some configurations are more popular than others, meeting the demands of a wide range of customers. The Dolly 10 L Carrier model is a standard model that features defined specifications. This standardised manufacturing leads to a greater availability and a more competitive price.
